

DURAWEAVE® FR COVERS

Strength & Durability

- DuraWeave® FR is a heavyweight fabric with 4 mil coatings, used for applications requiring flame retardancy and ultraviolet stability.
- The scrim, which is the woven part of the material, is constructed of individual tapes. The unique composition of the tapes and how they are woven together gives DuraWeave® FR its tremendous rip, tear and puncture strength.
- The specialized 4 mil coatings provide a more uniform and thicker protection layer for the scrim, increasing ultraviolet protection. The thicker coatings are more resistant to abrasion damage during both fabrication and installation of the cover.
- DuraWeave® FR comes with a 10-year pro rata warranty.

DuraWeave® FR Covers

Patented double stack weave provides unmatched strength to weight ratios.

All DuraWeave® FR covers feature a bright white underside that allows for maximum interior light.
